the proper handling
of information

General Security Awareness Training

Based on **NIST SP**
800-50/800-16

Strategies and techniques recommended by NIST for building and delivering awareness training material are adopted.

Clean and
flexible content

Content presented in an attractive manner, following e-learning and pedagogy good practices.

Wide
applicability

No special skills required. Security controls presented are detailed in a 30 to 40 training pages and 3 or 4 quizzes.

Customized for your
organization

Content is customized on your needs. A home security add-on can be optionally included.

Why General Security Awareness Training

The most extensive security awareness training dedicated to all the people in the organization. The training will deliver the knowledge you need to create a security-aware culture and guide the attendees to understand and react appropriately to the real and potential information security issues.
