of information

GDPR Intro Security Awareness Training

Organization specific

Delivered content is industry specific and in accordance with internal Security Policy.

Focus on data protection

Present how data is adequate, relevant and strictly limited to the processing purposes.

360 degrees coverage

Specific sessions-everybody in the organization is considered in the campaign.

GDPR specific issues

Data storage, retention and reporting security breaches are topping the thematic list.

Why GDPR Intro Security Awareness Training

Through GDPR Security Awareness Training

we help you to create and improve employee attentiveness towards the impact of security breaches, loss of sensitive data, and how to go about things to mitigate the risks.

GDPR-SAT Training Content

GDPR gives supervisory authorities the power to investigate and oversee the handling of personal data. In case an organization fails to comply, supervisory authorities have a number of options to choose from. Either they can issue a warning to controllers and processors, advise the organization to process data in a certain manner, cease their processing, or even compel an organization to report the data breach to the affected subjects.

- Personal Identifiable Information
